PRINCE2 Resource pack

- Complete PRINCE2-2009 official template files and additional content from the same author. Glossary and downloadable process map too.
- Ideal to support PRINCE2 training and for delivering multi deliverable projects in complex environments
- Set up with templates and tools ready to exploit reporting and content autofill on Personal Edition and multi-user platforms
- Free on all platforms
- Available to be personalised on all platforms except Community Edition.

PROJECT in a box **PRINCE2® Resource Pack**
Authentic PRINCE2® materials to support your learning and delivery

Home | Guidance Materials | Favourites | PROJECT in a box website

Resources

Templates
"The official PRINCE2 template pack provided set out as you will need them in Project Library and a Stage Library. The stage library can be repeated a number of times to provide the documentation set you need for your project. Add your own project files and develop the Specialist Products area to document your project as it progresses"

Glossary
"A new term? or maybe you are unsure.....
The Glossary provides live access to all the Glossaries you will need for project, programme and portfolio terms"

Process
"Struggling to remember which Products get produced, updated or used in each process...or perhaps who is responsible for working on them. The process diagram here is a great reminder.
Produced by one of the leading Training organisations"

1 Step Generic Process

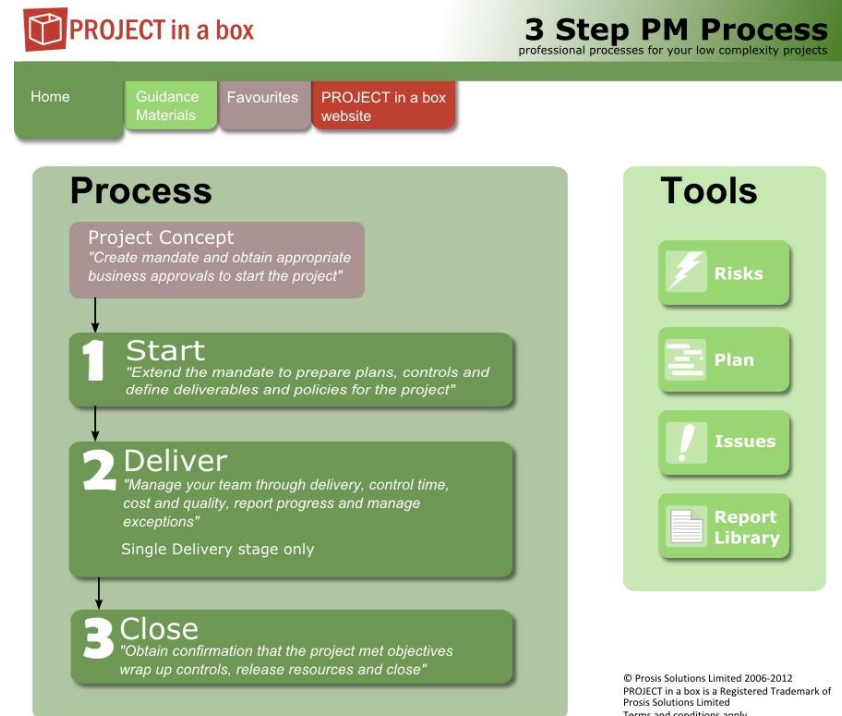

- Perfect for activities which aren't a project but which you want to manage in the same system
- Provides basic templates and task/resource, risk and issue integration for user governance.
- Free on all platforms
- Available to be personalised on all platforms except Community Edition.

The screenshot displays the '1 Step PM Process' interface. At the top, there is a navigation bar with 'Home', 'Guidance Materials', 'Favourites', and 'PROJECT in a box website'. The main content area is titled 'Process' and features a large '1 Deliver' button with the text: "Agree the task scope and controls, do the work making sure you agree changes, document the activities and obtain evidence that the outputs were acceptable". Below this, there are two sections: 'For me' and 'For manager'. Each section contains three buttons: 'Risks', 'Tasks', and 'Issues'. The 'For manager' section also includes three additional buttons: 'Project Permissions', 'Managing Approvals', and 'Contact the PMO'. In the bottom right corner, there is a small copyright notice: "© Prosis Solutions Limited 2006-2012. PROJECT in a box is a Registered Trademark of Prosis Solutions Limited. Terms and conditions apply."

3 Step Generic Process

- Ideal for single deliverable or small projects in low complexity environments.
- Templates, tools and guidance, processes pre-defined.
- Set up with templates and tools ready to exploit reporting and content autofill on Personal Edition and multi-user platforms
- Free on all platforms
- Available to be personalised on all platforms except Community Edition.

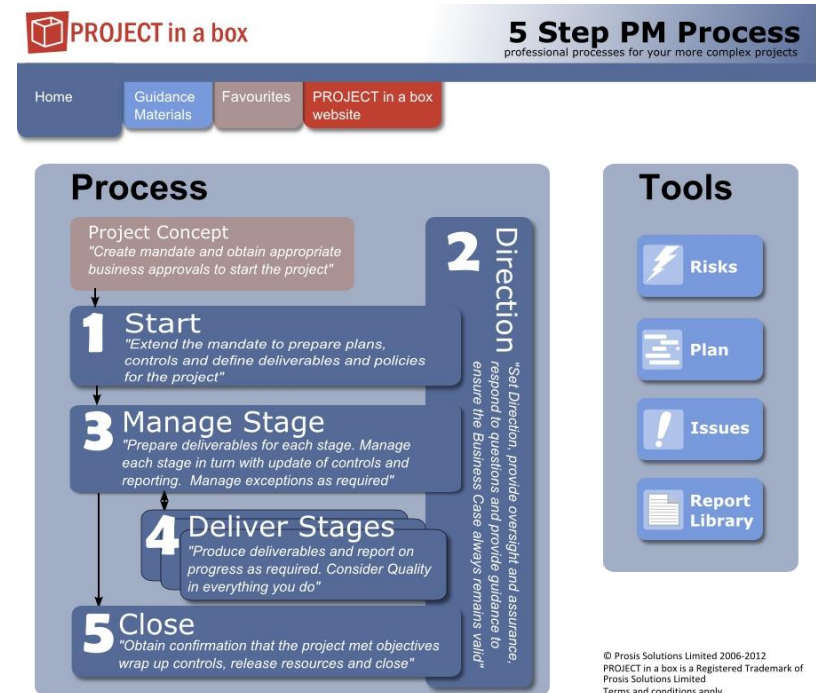

4 Step Generic Process

- Perfect for agile environments this method has a 3 step based project level of documentation and the ability to add a range of different stages, iterations or other packaged sets of documentation as the project progresses.
- Templates, tools and guidance, processes pre-defined.
- Set up with templates and tools ready to exploit reporting and content autofill on Personal Edition and multi-user platforms
- Free on all platforms (only one stage supported on Community Edition)
- Available to be personalised on all except Community Edition.

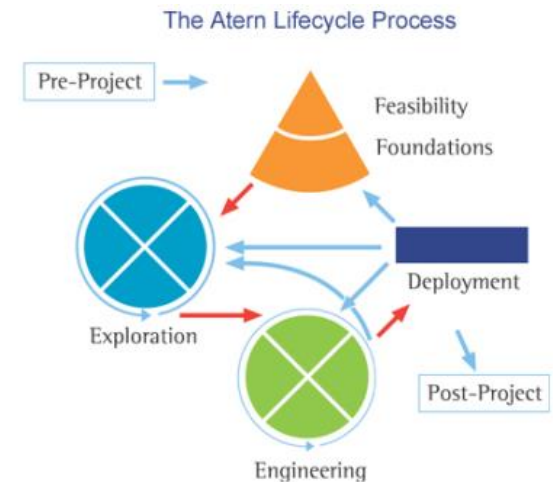

5 Step Generic Process

- Ideal for projects in mid complexity environments where multiple deliverables require the use of stages
- Templates, tools and Guidance, pre configured process mappings to ease management.
- Set up with templates and tools ready to exploit reporting and content autofill on Personal Edition and multi-user platforms
- Free on all platforms
- Available to be personalised on all platforms except Community Edition.

DSDM Atern

- The official DSDM Atern methodology including the full set of official templates and some additional ones provided by PIAB.
- Ideal for delivering agile projects in fast moving project environments or to support DSDM Atern training
- Set up with templates and tools ready to exploit reporting and content autofill on Personal Edition and multi-user platforms
- Free on all platforms
- Available to be personalised on all platforms except Community Edition.

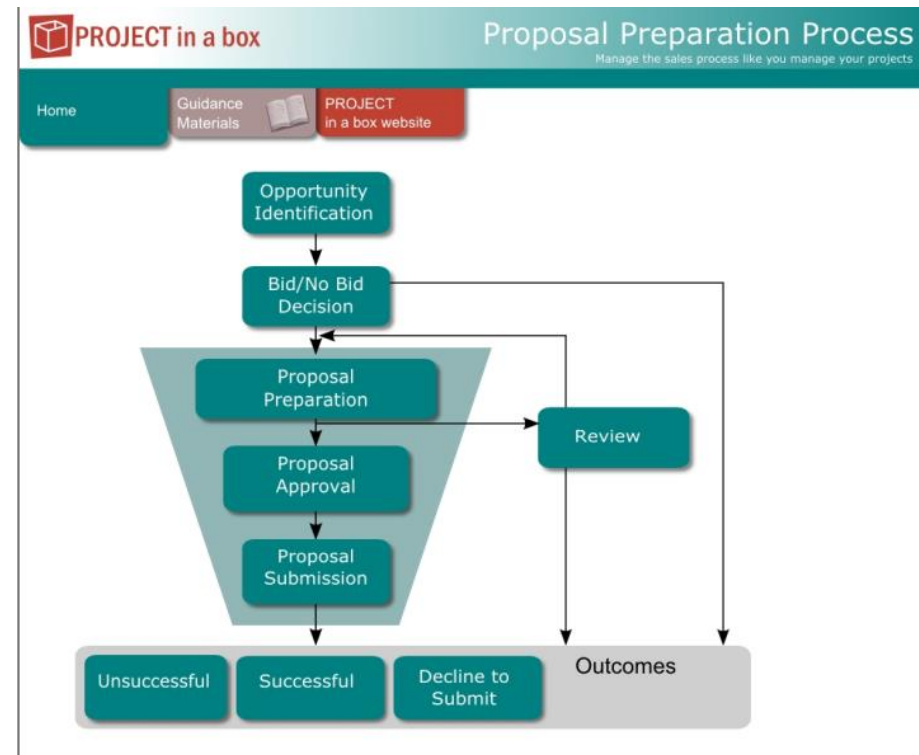

Additional Resources

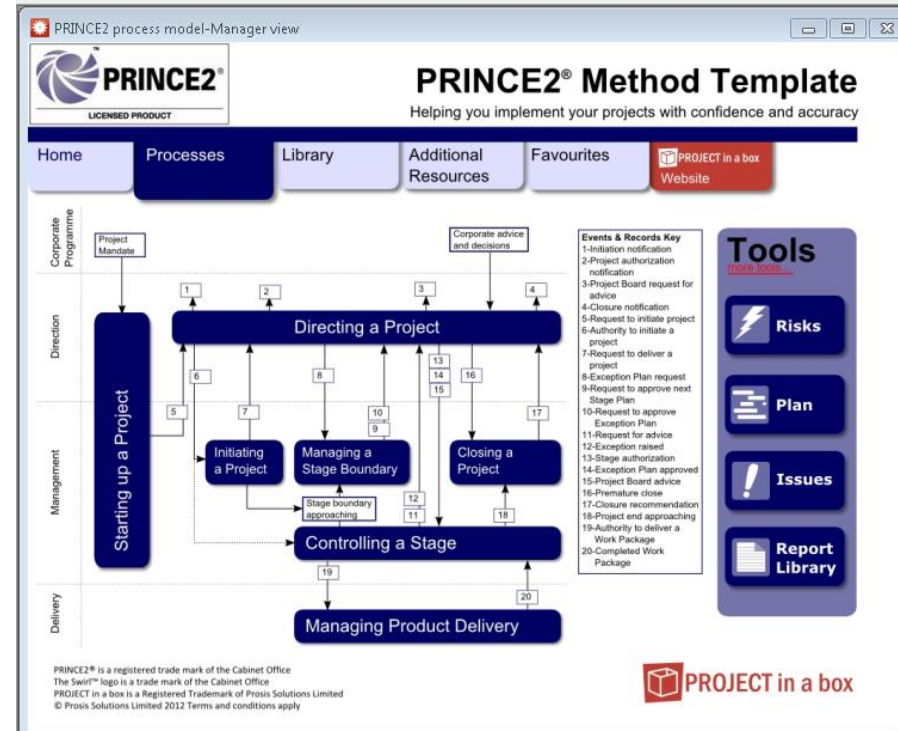

PPP-2011

- Methodology to help you manage large proposals and tender responses like you might manage a project
- Includes a full set of templates, tools and checklists
- Set up with templates and tools ready to exploit reporting and content autofill on Personal Edition and multi-user platforms
- Free on all platforms
- Available to be personalised on all platforms except Community Edition.

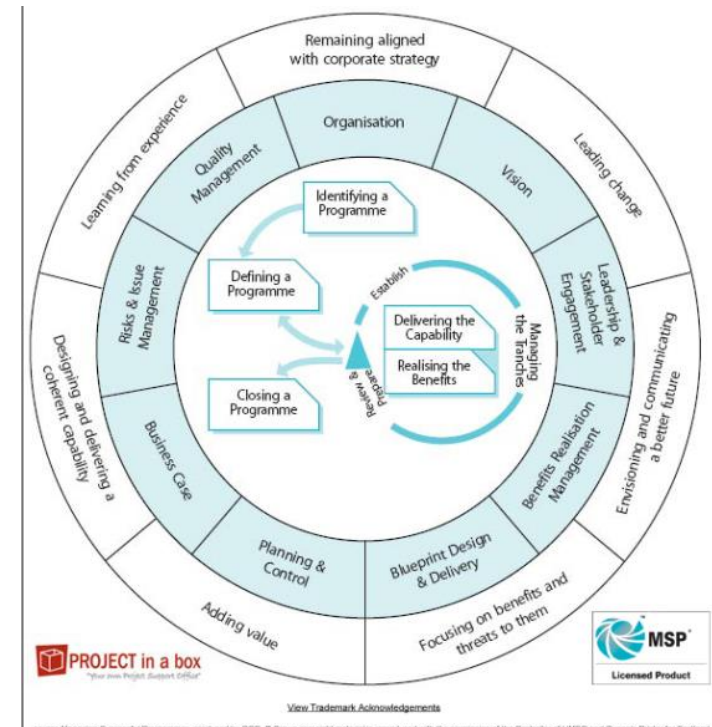

PRINCE2 Method Template

- All the content of the PRINCE2 resource pack plus additional guidance materials.
- Packaged up into processes for easy implementation saving time referring to the manual
- Set up with templates and tools ready to exploit reporting and content autofill on Personal Edition and multi-user platforms
- Commercial add on for all platforms from Just £15
- Available to be personalised on all platforms except Community Edition.

MSP

- The complete Managing Successful Programmes methodology provided as an Official licensed product.
- Ideal for supporting MSP learning/training and in delivering programmes in conjunction with the other project methods provided.
- Provides a full set of MSP templates and guidance material directly from the manual
- Free on Enterprise Edition, paid add on for other platforms
- Once purchased it is available to be personalised on all platforms except Community Edition.

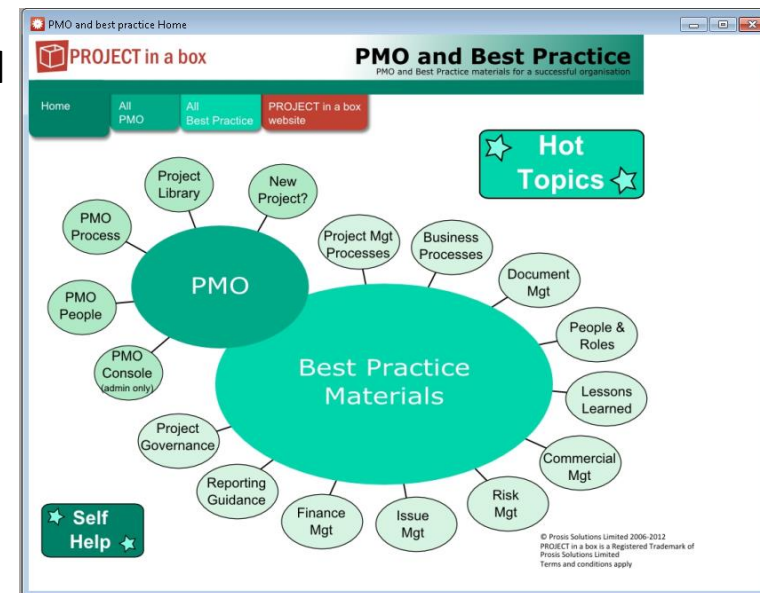

Lessons Learned Library

- Share important resources from each project to here and they will be indexed and available to search by any user you give permissions to.
- Docs are shared from the live project and retained when the project is closed so the library builds up over time.
- Only available on Small Team and Enterprise Editions.

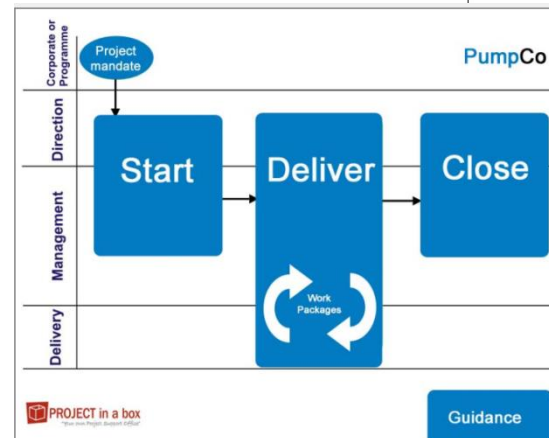

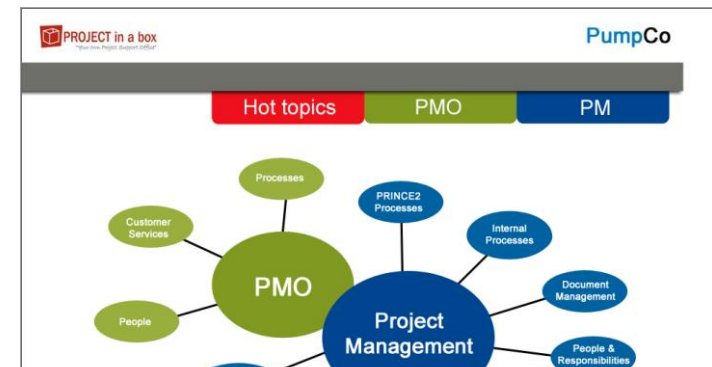

PMO Best Practice

- Create once on your server
- Provides the perfect extensible host for all your policy, procedure and best practice information
- Provide read only access to all users and edit access to topic champions
- Many customers integrate the reference material held here into their methods, perfect to support best practice as you mature
- Ideal for implementing P3O around
- Available free on Small Team and Enterprise Editions.

Build your own method

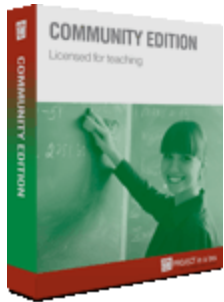

- Except on Community Edition you can define your own methodology and define it as a standard from which projects can be consistently created. You can have as many of these as required.
- You define the templates and tools ready to feed into reporting and decide the properties to be autofilled.
- Free for your internal use on all platforms except Community Edition
- For further information please contact us.
